

My friend, Rep Kevin Brady, tells me the legislature is in the business of "unintended consequences." Surely, this must be true for this new fax rule. So many important issues will leave the association/nonprofit community vulnerable, not the least of how the gathering of industry info is done, how lapsed members are contacted, how we take our NON-PROFIT message to the community. Please don't put us in a position to have to defend complaints and lawsuits which are unearned and undeserved...we are NOT telemarketers with faxes!
